Subject: IBC project - Viability of viruses after exposure to copper-treated masks IBC Meeting Minutes - April 13, 2020
Date: Monday, April 13, 2020 1:46:00 PM

Attendees: Maureen Ferran, Dawn Carter, Jennie Liedkie, Kim Corbett, Cindy White, Paul Craig, Gary Skuse, Jennifer Harman, Dave Armanini, Vinay Abhyankar, Judy Foster

IBC project review comments:

1. Added BSL2 to second virus in Table A.1.a.
2. Removed BSL2+ notations in Question K. CDC/NIH/ the BMBL doesn't recognize BSL2+. All work being done with this project will be covered with the BSL2 designation.
3. Ken Reed will only be providing the mask material and not working in the lab. This was noted in Question J.2.
4. This is considered critical research. Maureen has submitted the necessary paperwork/information to VP of Research for approval.
5. The waste procedure being followed is in Maureen's SOP that was previously approved. The biosafety cabinet should be not be used as a satellite storage location for biological waste.
 - 5a. Glassware can be rinsed with 10% bleach to kill the virus internally before autoclaving.
 - 5b. Disposable labware can be put in red bags which can be tied and stored in the refrigerator or freezer until autoclaved.
6. No lab inspection is required. It was previous inspected by Cindy White.
7. The IBC approves the project. Cindy to sign off her portion of the form and submit it to Dick Doolittle for his signature and committee approval letter. (Done)
