

Course Offering: **THIS FALL**

**DEPT ###**

**Full Course Name Here**

**Time**

**Tuesdays 5:00 PM–6:30 PM**

**Location**

**INS 1140 (Institute Hall)**

**Faculty**

**Faculty Name**

**Credits**

**# Credits**

**Max Capacity**

**# Students**

**Prerequisites**

**Prerequisite Course(s)**

Students still need to contact their academic advisor to enroll. Enrollment is first-come-first-served

This course provides opportunities to:

- Understand what employers expect in addition to your technical skills
- Sharpen your core non-technical skills (soft skills) you need to find a co-op/job
- Network with RIT employers and recruiting professionals in a small group
- Learn from employers what criteria they use to select or reject engineering students
- Acquire confidence to apply for co-ops and full-time jobs
- Build a soft skills portfolio that could be shared with employers
- Land a co-op or full-time job opportunity through networking

**Course Description:**

Taught in a workshop format, this course provides an opportunity for undergraduate CET students to enhance their emotional intelligence, through assessment and if necessary, modification of personality traits and development of interaction skills. This course prepares students for success in the workplace, teaching those skills that enhance the ability to interact effectively and work harmoniously within the workplace. Students may enroll prior to working in a co-op position and/or prior to graduation and seeking employment.
