

A close-up photograph of a microchip assembly process. A yellow die is being placed onto a substrate by a robotic arm. The substrate has 'RIT' printed on it. The background is dark and out of focus.

NSF Ph.D. Traineeship @ RIT

**RIT's CMOS+X NSF Research Traineeship Program
is recruiting Ph.D. trainees!**

4 Research Tracks

- Track 1:** Semiconductor Material Innovations
- Track 2:** Semiconductor Micro- and Nanoelectronics
- Track 3:** Semiconductor Optoelectronics and Photonics
- Track 4:** Integrated Circuits, Systems, and Packaging

A CMOS+X Ph.D. traineeship includes:

- Personalized curriculum
- Workshops/seminars/events/journal clubs for all NRT trainees
- Internships at major semiconductor companies and government laboratories
- Teaching experiences
- NRT seed grant competition
- Conference travel support

Fellowships are also available that include:

- Annual \$34K stipend with full tuition support for up to four years
