Communication and Deaf Culture

Signing in Public Spaces

All members of the NTID community are expected to demonstrate fundamental respect for the language and communication preferences and needs of one another.

To maintain open, respectful communication, support incidental learning, and maximize student learning, all faculty and staff are expected to sign in public spaces, to the best of their ability.

NTID's Position on Language, Communication and Modality*

The NTID community, (including administrators, faculty, staff, and students), remains mindful of differentiating between two languages, specifically, ASL and English, and how information is delivered through communication.

* Definitions:

Language - English and American Sign Language

Communication - How information is delivered

Modality - Speech, sign language, writing

continues to next slide →

NTID's Position on Language, Communication and Modality (cont'd)

Tenets:

1. NTID acknowledges ASL as a legitimate language with its own grammatical and linguistic features using a visual and signed modality.
2. Our faculty, staff and students bring diverse communication methods, including sign language, to our educational community. NTID's diversity and inclusiveness key qualities include a bilingual and multicultural campus environment.
3. NTID recognizes itself as a bilingual institution where both ASL and English are equally respected and valued as languages of instruction and learning. Both are used in instruction and throughout NTID, and we encourage all students to continue developing their ASL and English skills.

NTID's Position on Language, Communication and Modality (cont'd)

4. The hallmark of the NTID community is recognizing, studying and using English and ASL as the languages of our bilingual educational community, with members acknowledging the varied language competencies of our students and colleagues.
5. Our institutional responsibility is to model and provide clear, effective use of both languages, ASL and English. As such, our administrators, faculty and staff bear a personal responsibility for clear language use both within the classroom and out, as well as a responsibility for ensuring understanding of and by others.
6. Faculty at NTID are responsible for ensuring that classroom communication and language use is accessible and clear to all students. NTID will continue to provide training and support to faculty to ensure that they are meeting the needs of students.
