

Why climate resiliency starts with how tomorrow's architects are trained

Climate change poses a big risk to the built environment: How prepared are the buildings we use every day for more extreme weather events? For Seth Holmes, an associate professor of architecture at GIS, this is a question he asks his students on day one. [Read more](#)

Can New York manufacturers flourish under the Climate Act? Yes—here's how

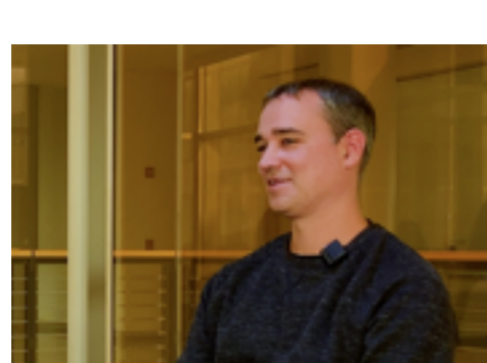

New York's Climate Act will trigger seismic changes for small and medium-sized manufacturers. The state's diverse network of assistance programs will have a vital role in helping SMEs not only meet new regulations, but grow stronger through them. [Read More](#)

How an NYSP2I reimbursement program is helping the state waste less food

New York's Food Waste Reduction and Diversion Reimbursement Program has surpassed its goal this year, helping businesses across the state avoid sending more than 45,000 tons of food waste to landfills. It was launched in 2018 by the New York State Pollution Prevention Institute (NYSP2I) at GIS. [Read more](#)
