

Welcome!

Urban food waste solutions from farm-to-fork: A conference for
advancing sustainable urban systems research networks

Aug 5-6, 2019

Workshop Goals:

1. Identify drivers of and potential solutions for food loss and waste in urban systems

Workshop Goals:

1. Identify drivers of and potential solutions for food loss and waste in urban systems
2. Understand how food waste solutions can create sustainability “co-benefits” or tradeoffs

Workshop Goals:

1. Identify drivers of and potential solutions for food loss and waste in urban systems
2. Understand how food waste solutions can create sustainability “co-benefits” or tradeoffs
3. Evaluate enablers and barriers for transforming urban systems

Workshop Goals:

1. Identify drivers of and potential solutions for food loss and waste in urban systems
2. Understand how food waste solutions can create sustainability “co-benefits” or tradeoffs
3. Evaluate enablers and barriers for transforming urban systems
4. Consider scalability and generalizability in diverse urban contexts

Workshop Outcomes:

Sustainable urban systems research network:

- New convergent collaborations
- Future research funding, papers, exchanges
- Academic-stakeholder partnerships

Workshop Engagement:

www.sli.do

#FOOD

Workshop organization:

Hanna Breunig

Missy Hall

Chuck Nicholson

Todd Nicewonger

Kaitlin Stack Whitney

Xiaobo Xue Romeiko

Tom Trabold
